My favourite film is *Mars Attacks!* It is a fantastic comedy. The director's name is Tim Burton. It was made in the USA in 1996. It stars Pierce Brosnan, Jack Nicholson, Glenn Close and Sarah Jessica Parker. The story is about Martians who decide to attack our planet and they always blow everything up. The main characters are: the President of the United States, Texan alcohol dealer, newsman (Jason Stone), TV hostess (Nathalie Lake), General Decker, Professor Kessler, and, of course, the Martians. The story takes place in the USA and around the world. My favourite scene is when the Martians play bowling with the statues on Easter Island. *Mars Attacks!* is a great comedy for the whole family.

Mars Attacks! is a fantastic comedy. The story takes place in the USA and around the world. The main characters are: the President of the United States, Texan alcohol dealer, newsman (Jason Stone), TV hostess (Nathalie Lake), General Decker, Professor Kessler, and, of course, the Martians.

Here's the story: The Martians decide to attack our planet and they always blow everything up. Why? Because it's fun! They enjoy killing people and blowing things up. They even play bowling with the statues on Easter Island. The Martians have green brains and always shout "Ack! Ack!" because it's the only thing they can say.

General Decker doesn't trust the Martians and insists they fight, but General Casey and Professor Kessler are more optimistic. The Martians appear to come in peace but suddenly begin to use their super-powerful weapons to destroy the population and great structures and buildings. Will anybody find a way to stop them or will they all die in the war with these short, big-brained aliens?

There are lots of famous Hollywood stars in the film: Pierce Brosnan, Jack Nicholson, Glenn Close and Sarah Jessica Parker.

Mars Attacks! is a great comedy for the whole family. Don't miss it!
